Description of Training Program	
<p>CCNA (Cisco Certified Network Associate) provided by Cisco which demonstrates the candidate's ability to set up and maintain different types of network. CCNA lays the foundation for all other Cisco certifications. The Cisco Certified Network Associate (CCNA) designation Indicates an apprentice knowledge of networking. The CCNA knows how to Install, configure, and operate simple (100 nodes or fewer) routed LAN, WAN, and dial access services, as well as switched LANs and ATM LANE networks. They also need to be able to optimize WAN traffic through Internet access that reduce bandwidth. Familiarity with routers and switches. As Enterprises migrate toward controller-based architectures, the role and skills required of a core network engineer are evolving and more vital than ever. To prepare for this network transition, the CCNA will not only prepare students with the knowledge of foundational technologies but ensure them to stay relevant with skill sets needed for the adoption of next generation technologies.</p>
