### Description of Training Program:

Network Technician is comprised of 2 courses: Introduction to IoT and Introduction to Network. This curriculum introduces learners to an engaging, exploratory view of programming devices, Big Data, analytics, automation and computer networks. Students then learn the architecture, structure, functions, components, and models of the Internet. At the conclusion of this curriculum, learners will be able to build simple local area networks (LANs), perform basic configurations for routers and switches, and implement IP addressing schemes.
